| Appendix F | Summary of EMIS                                                             |

## EXECUTIVE SUMMARY

This is the 239<sup>th</sup> monthly Environmental Monitoring and Audit (EM&A) report for the Project “Operation of Lamma Power Station Extension” prepared by the Environmental Team (ET). This report presents the results of impact monitoring on air quality, noise, water quality and environmental audit for the operation of the said Project in August 2026.

Air quality, noise and water quality monitoring were performed. The results were checked against the established Action/Limit (AL) levels. The implementation status of the environmental mitigation measures, Event/Action Plan and environmental complaint handling procedures were also checked.

### Plant Availability

Units L10 and L11 were fully available in the reporting month. Units L9 and 12 were out of service during the following period.

| Unit | Period                               | Remark                                                                                                                                  |
|------|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| L9   | 21/08/2026 22:32 to 22/08/2026 05:59 | Control oil system Fuller’s earth filter routine replacement                                                                            |
| L12  | 28/08/2026 20:50 to 29/08/2026 06:56 | Control oil system Fuller’s earth filter routine replacement and restoration works on the Unit Tx and Generator Tx differential relays. |

### Environmental Monitoring Works

EPD officials from Regional Office (South) visited Lamma Power Station on 26/8/2026. There was no adverse comment received from EPD regarding the operation of Lamma Power Station Extension.

Environmental monitoring works, as mentioned in the EM&A Manual (Operational phase), were performed during the operation of Lamma Power Station Extension in the reporting period.

#### *Air Quality*

No exceedance of Action and Limit levels for stack NO<sub>x</sub> was recorded in the reporting month.

#### *Noise*

No exceedance of Action and Limit levels for noise was recorded in the reporting month.

#### *Water Quality*

No exceedance of Action and Limit levels for water quality was recorded in the reporting month.

### Environmental Licensing and Permitting

| Description          | Permit / Licence No. | Valid Period |    | Issued To   | Date of Issuance |
|----------------------|----------------------|--------------|----|-------------|------------------|
|                      |                      | From         | To |             |                  |
| Environmental Permit | EP-071/2000/D        | 28/09/2020   | -  | HK Electric | 28/09/2020       |

| Description                                   | Permit / Licence No. | Valid Period |            | Issued To   | Date of Issuance |
|-----------------------------------------------|----------------------|--------------|------------|-------------|------------------|
|                                               |                      | From         | To         |             |                  |
| Specified Processes Licence issued under APCO | L-7-002(15)          | 01/01/2025   | 31/12/2026 | HK Electric | 18/11/2024       |
| WPCO Discharge Licence for L1-L12             | WT00047523-2025      | 26/01/2026   | 30/11/2027 | HK Electric | 26/01/2026       |

### Implementation Status of Environmental Mitigation Measures

Environmental mitigation measures were implemented in the reporting month.

### Environmental Complaints

No complaint in relation to the environmental impact of the Project was received in the reporting month.

### Future Key Issues

Key issues to be considered in the coming month include:

#### *Air Impact*

- To continuously monitor the stack NO<sub>x</sub> for Lamma Power Station Extension.

#### *Noise Impact*

- To continuously monitor the noise for Lamma Power Station Extension.

#### *Water Impact*

- To continuously carry out the water quality monitoring for Lamma Power Station Extension.

### Concluding Remarks

The environmental performance of the Project was generally satisfactory.

## 1. INTRODUCTION

The operational phase Lamma Power Station Extension commenced in mid October 2006 following the completion of erection works and commissioning tests for Unit L9. The Environmental Team (hereinafter called the “ET”) was formed within The Hongkong Electric Co., Ltd. (HK Electric) to undertake Environmental Monitoring and Audit for “Operation of Lamma Power Station Extension” (hereinafter called the “Project”). Under the requirements of Section 6 of Environmental Permit EP-071/2000/D, an EM&A programme for impact environmental monitoring set out in the EM&A Manual (Operational Phase) is required to be implemented. In accordance with the EM&A Manual, environmental monitoring of air quality, noise and water quality are required for the Project.

This report summarizes the environmental monitoring and audit work for the Project for the month of August 2026.

### 1.1 Plant Availability

Units L10 and L11 were fully available in the reporting month. Units L9 and 12 were out of service during the following period.

| Unit | Period                               | Remark                                                                                                                                  |
|------|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| L9   | 21/08/2026 22:32 to 22/08/2026 05:59 | Control oil system Fuller’s earth filter routine replacement                                                                            |
| L12  | 28/08/2026 20:50 to 29/08/2026 06:56 | Control oil system Fuller’s earth filter routine replacement and restoration works on the Unit Tx and Generator Tx differential relays. |

### 1.2 Summary of EM&A Requirements

The EM&A program requires environmental monitoring for air quality, noise and water quality. The EM&A monitoring work for air quality, noise and water quality are described in [Sections 2, 3 and 4](#) respectively.

The following environmental audits are summarized in [Section 5](#) of the report:

- Environmental monitoring results;
- The implementation status of environmental protection and pollution control / mitigation measures.

The future key issues for the Project will be reported in [Section 6](#) of this report.

## **2. AIR QUALITY**

### **2.1 Monitoring Requirements**

In accordance with the EM&A Manual (Operational Phase) for Lamma Extension, stack NO<sub>x</sub> is continuously monitored. Stack NO<sub>x</sub> monitoring data would be checked against the Action/Limit Levels stated in the EM&A Manual. The monitoring frequency is shown in [Table 2.1](#) below:

Table 2.1 Air Quality Monitoring Parameter and Frequency

| Parameter                            | Frequency  |
|--------------------------------------|------------|
| Hourly Average Stack NO <sub>x</sub> | Continuous |

### **2.2 Summary of Results and Observations**

Monitoring of stack NO<sub>x</sub> was conducted during the operation of Units L9, L10, L11 and L12 in the reporting month. A monthly summary of monitoring data is shown in [Appendix C](#).

No Action/Limit Level exceedance on stack NO<sub>x</sub> was recorded in the reporting month.

### **2.3 Implementation Status of Monitoring of Ammonia**

Monitoring of ammonia for the use of Selective Catalytic Reduction System for NO<sub>x</sub> control was conducted pursuant to the requirement of Specified Process (SP) licence under the Air Pollution Control Ordinance. No non-compliance of SP licence requirement on stack NH<sub>3</sub> emission was recorded in the reporting month. The relevant data would be submitted to EPD under a separate submission for the SP licence. To avoid duplication of effort, the monitoring and reporting requirements for ammonia under the SP licence will not be included in this EM&A programme.

### 3. NOISE

#### 3.1 Monitoring Requirements

In accordance with the EM&A Manual for Lamma Extension (Operational Phase), continuous noise monitoring at Ash Lagoon is carried out to calculate the noise arising from the operation of Lamma Extension at the critical NSR at Hung Shing Ye. Baseline noise levels are applied for correction to the noise monitoring data. The data after corrections would be checked against the Limit Levels specified in the EM&A Manual.

The noise monitoring location is shown in [Figure 3.1](#). The monitoring parameter and frequency are shown in [Table 3.1](#) below:

Table 3.1 Noise Monitoring Parameter and Frequency

| Parameter        | Frequency  | Time Period                                     |
|------------------|------------|-------------------------------------------------|
| 30-min $L_{Aeq}$ | continuous | 0700 - 2300 hrs and 2300 - 0700 hrs of next day |

With the endorsement of the Independent Environmental Checker, the enhancement of calibration of sound level meter at the noise monitoring station was implemented. The monthly manual on-site calibration using sound level calibrator was replaced by the daily auto charge injection calibration function of the sound level meter. For additional quality assurance, manual on-site calibration is still conducted for the noise monitoring station once every 6 months. The manual on-site calibration was carried out in May 2026 and the next calibration was scheduled in November 2026. The verification of the sound level meter/calibrator by the manufacturer or an accredited laboratory biennially / annually remains unchanged.

#### 3.2 Summary of Results and Observations

Continuous noise monitoring was conducted at the monitoring station at Ash Lagoon. The monitoring results are shown in [Appendix D](#).

No Action/Limit Level exceedance on noise was recorded in the reporting month.

Figure 3.1      Location of Noise Monitoring Station

## 4. WATER QUALITY

### 4.1 Monitoring Requirements

In accordance with the EM&A Manual for Lamma Extension (Operational Phase), the monitoring requirements for the EM&A work should strictly follow the discharge licence for L1-L12 issued under the Water Pollution Control Ordinance (WPCO).

The parameters as stated in [Table 4.1](#) were monitored and checked against the Action/Limit Levels as given in [Appendix B](#).

Table 4.1 Water Quality Monitoring Parameters and Frequencies

| Item | Parameters                              | Frequencies             |
|------|-----------------------------------------|-------------------------|
| 1    | Cooling Water Temperature Rise          | Daily                   |
| 2    | Total Residual Chlorine                 | Bi-weekly               |
| 3    | Temperature of Blowdown Effluent        | At least twice per year |
| 4    | Suspended Solids from Blowdown Effluent | At least twice per year |
| 5    | Grease & Oil from Blowdown Effluent     | At least twice per year |
| 6    | Scum of foam in ambient water           | Daily                   |

### 4.2 Summary of Results and Observations

Monitoring of various parameters as listed in Table 4.1 above was carried out during the operation of Units L9, L10, L11 and L12 in the reporting month. A monthly summary of the data is shown in [Appendix E](#).

The data recorded for the monitoring parameters were all below their corresponding Action/Limit Levels. No Action/Limit level exceedance was recorded in the reporting month. There was no foam present within 500 meters of Hung Sing Ye Beach in the reporting month. Details of the foam observation report are also given in [Appendix E](#). The effluent quality was generally satisfactory.

### 4.3 Implementation Status on Thermal Plume and Residual Chlorine Surveys

One survey for thermal plume and residual chlorine concentration at the seawater around the discharges from the Lamma Power Station and Lamma Power Station Extension shall be carried out after the commissioning of each of the generating units for the Project in dry and wet seasons.

The surveys for Units L9, L10, L11 and L12 were completed in July 2007, August 2021, January 2023 and July 2025 respectively.

## 5. ENVIRONMENTAL AUDIT

EPD officials from Regional Office (South) visited Lamma Power Station on 26/8/2026. There was no adverse comment received from EPD regarding the operation of Lamma Power Station Extension.

### 5.1 Review of Environmental Monitoring Procedures

The environmental monitoring procedures were regularly reviewed by the Environmental Team. No modification to the existing monitoring procedures was recommended.

### 5.2 Assessment of Environmental Monitoring Results

#### *Monitoring results for Air Quality, Noise and Water Quality*

The environmental monitoring results for air quality, noise and water quality in August 2026 presented in Sections 2, 3 and 4 respectively are summarized in [Table 5.1](#).

Table 5.1 Summary of Action/Limit Level Exceedances on Monitoring Parameters

| Item  | Parameter Monitored                                                                               | Monitoring Period        | No. of Exceedances |             | Event/Action Plan Implementation Status and Results |
|-------|---------------------------------------------------------------------------------------------------|--------------------------|--------------------|-------------|-----------------------------------------------------|
|       |                                                                                                   |                          | Action Level       | Limit Level |                                                     |
| Air   |                                                                                                   |                          |                    |             |                                                     |
| 1     | Stack NOx                                                                                         | 01/08/2026<br>31/08/2026 | 0                  | 0           |                                                     |
| Noise |                                                                                                   |                          |                    |             |                                                     |
| 1     | Noise levels at the critical NSR at Hung Shing Ye calculated by the noise alarm monitoring system | 01/08/2026<br>31/08/2026 | 0                  | 0           |                                                     |

Note: \* Monitoring was not scheduled in the reporting month

#### *Land Contamination*

There was no land contamination incident happened in the reporting month.

#### *Waste Management*

Waste management practice was properly implemented for operation of the Project as outlined in the Waste Management Plan for Lamma Power Station Extension. There was no unacceptable environmental impact on waste management in the reporting month.

### 5.3 Status of Environmental Licensing and Permitting

All permits/licenses obtained as of August 2026 are summarised in [Table 5.2](#).

Table 5.2 Summary of Environmental Licensing and Permit Status

| Description                                   | Permit / Licence No. | Valid Period |            | Status |
|-----------------------------------------------|----------------------|--------------|------------|--------|
|                                               |                      | From         | To         |        |
| Environmental Permit                          | EP-071/2000/D        | 28/09/2020   | -          | Valid  |
| Specified Processes Licence issued under APCO | L-7-002(15)          | 01/01/2025   | 31/12/2026 | Valid  |
| WPCO Discharge Licence for L1-L12             | WT00047523-2025      | 26/01/2026   | 30/11/2027 | Valid  |

#### 5.4 Implementation Status of Environmental Mitigation Measures

Mitigation measures detailed in the permits and the EM&A Manual (Operational Phase) are required to be implemented. An updated summary of the Environmental Mitigation Implementation Schedule (EMIS) is presented in [Appendix F](#).

#### 5.5 Implementation Status of Event/Action Plans

The Event/Action Plans for air quality, noise and water quality extracted from the EM&A Manual (Operational Phase) are presented in [Appendix A](#).

#### 5.6 Implementation Status of Environmental Complaint Handling Procedures

In August 2026, no complaint in relation to the environmental impact of the Project was received.

Table 5.3 Environmental Complaints Received in August 2026

| Case Reference /<br>Date, Time Received /<br>Date, Time Concerned | Descriptions /<br>Actions Taken | Conclusion /<br>Status |
|-------------------------------------------------------------------|---------------------------------|------------------------|
| Nil                                                               | N/A                             | N/A                    |

Table 5.4 Outstanding Environmental Complaints Carried Over

| Case Reference /<br>Date, Time Received /<br>Date, Time Concerned | Descriptions /<br>Actions Taken | Conclusion /<br>Status |
|-------------------------------------------------------------------|---------------------------------|------------------------|
| Nil                                                               | N/A                             | N/A                    |

## **6. FUTURE KEY ISSUES**

### **6.1 Outage Plan for the coming 3 months**

No major outage plan in the coming three months.

### **6.2 Key issues for the coming month**

Key issues to be considered in the coming month include:

#### *Air Impact*

- To continuously monitor the stack NO<sub>x</sub> for Lamma Power Station Extension.

#### *Noise Impact*

- To continuously monitor the noise for Lamma Power Station Extension.

#### *Water Impact*

- To continuously carry out the water quality monitoring for Lamma Power Station Extension.

## **7. CONCLUSION**

Environmental monitoring was performed as required in the reporting month. All monitoring results were checked and reviewed.

No Action/Limit level exceedance on stack NO<sub>x</sub> was recorded in the reporting month.

No Action/Limit level exceedance on noise was recorded in the reporting month.

No Action/Limit level exceedance on water quality parameters was recorded in the reporting month.

Environmental mitigation measures recommended in the EM&A Manual for the operational activities were implemented in the reporting month. No complaint in relation to the environmental impact of the Project was received in the reporting month. No prosecution was received for this Project in the reporting period.

The environmental performance of the Project was generally satisfactory.

## Appendix A Event/Action Plans

Table A.1 Event/Action Plan for Air Quality

| Exceedance                                    | ET Leader                                                                                                                                                                                                                                                                                                                                                                                                                                                 | IEC                                                                                                                                                                              | Operations Engineer                                                                                                                                                                                                                           |

| 19/8/2026 | 60                                                                       |
| 20/8/2026 | 58                                                                       |
| 21/8/2026 | 56                                                                       |

| Date      | Daily Maximum Stack NOx concentration (mg/Nm <sup>3</sup> ) <sup>#</sup> |
|-----------|--------------------------------------------------------------------------|
| 22/8/2026 | 54                                                                       |
| 23/8/2026 | 53                                                                       |
| 24/8/2026 | 53                                                                       |
| 25/8/2026 | 54                                                                       |
| 26/8/2026 | 56                                                                       |
| 27/8/2026 | 50                                                                       |
| 28/8/2026 | 51                                                                       |
| 29/8/2026 | 51                                                                       |
| 30/8/2026 | 51                                                                       |
| 31/8/2026 | 52                                                                       |

Note: # - Hourly average value. Expressed as at 0°C, 101.325kPa, dry and corrected to 15% O<sub>2</sub> condition.

\* - Unit L9 was not on load.

^ - The NOx concentration was 80.8 mg/Nm<sup>3</sup>, which is below the Action Level of 81 mg/Nm<sup>3</sup>.

| 27/8/2026 | 3                                                                        |
| 28/8/2026 | 3                                                                        |
| 29/8/2026 | 3                                                                        |
| 30/8/2026 | 3                                                                        |
| 31/8/2026 | 3                                                                        |

The daily maximum stack NOx concentration complies with the Action/Limit Level for all unit loading ranges.

Note: # - Hourly average value. Expressed as at 0°C, 101.325kPa, dry and corrected to 15% O<sub>2</sub> condition.

\* - Unit L10 was not on load.

^ - Unit L10 was operating with loading less than 266 MW.

The daily maximum stack NOx concentration complies with the Action/Limit Level for all unit loading ranges.

Note: # - Hourly average value. Expressed as at 0°C, 101.325kPa, dry and corrected to 15% O<sub>2</sub> condition.

\* - Unit L11 was not on load.

^ - Unit L11 was operating with loading less than 266 MW.

- Note:
1. “---“represents the measured noise monitoring data lower than the established notional background level/discarded under strong wind/ bird sound.
  2. Pursuant to the EM&A Manual (Operational Phase), the corrections for accounting the differences of barrier attenuations and atmospheric absorption attenuations for the noise monitoring station and noise sensitive receiver are 5 dB(A) and 2 dB(A) respectively.

## **Appendix E    Summary Results and Observations on Water Quality Monitoring**

### **Maximum Outlet Temperature Rise (Deg. Celsius) of Cooling Water at C.W. Outfall No.3 Serving Units L9, L10 & L11**

#### **Weighted by Flowrates of Individual Streams (August 2026)**

| Date      | Maximum Outlet Temperature Rise<br>(Deg. Celsius) |
|-----------|---------------------------------------------------|
| 1/8/2026  | 6.1                                               |

**Observation of Scum Formation in Marine Waters Mixing Zone at Lamma Power Station Extension (August 2026)**

| Date      | Observation                                                                                                                                                                       |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                                       |
| 2/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                                       |
| 3/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                                       |
| 4/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                                         |
| 5/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                                         |
| 6/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                                         |
| 7/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 8/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 9/8/2026  | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                                         |
| 10/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4                     |
| 11/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination, dispersed by ferry and defoamer added to Outfalls No.3 & No.4 |
| 12/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4                     |
| 13/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 14/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                                         |
| 15/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 16/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 17/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 18/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                          |
| 19/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam                                                                                                         |

| Date      | Observation                                                                                                                                                   |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
|           | outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                                                                                                |
| 20/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                      |
| 21/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.2 to No.4                     |
| 22/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4 |
| 23/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4 |
| 24/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4 |
| 25/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; reduced chlorination and defoamer added to Outfalls No.3 & No.4 |
| 26/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                      |
| 27/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                   |
| 28/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station; Some foam outside CW Outfall; and defoamer added to Outfalls No.3 & No.4                      |
| 29/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                   |
| 30/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                   |
| 31/8/2026 | No scum within 500m of HSY Beach & NW/SW corner of the Station & CW Outfall                                                                                   |

## Appendix F Summary of EMIS

| EM&A Log Ref. | Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Implementation Status |

|               | <b>AIR QUALITY</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                       |
| A1            | Implement the gas-fired units as base-load units. For the existing power station, the more efficient units incorporating FGD and low NOx systems shall be operated first under normal situation to meet system demand. In case of any deviations from this, EPD shall be notified of the details and circumstances for the deviation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Complied              |
| A2            | HK Electric shall undertake annual revisions and update of its GHG emissions inventory, which covers all HK Electric existing facilities and new extension, for at least the six GHGs specified under the Kyoto Protocol (CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O, HFCs, PFCs and SF <sub>6</sub> ). The inventory shall be established and maintained in accordance with the latest IPCC Guidelines or any other guidelines issued by Government, with details documented for regular reviews and updates. The inventory shall be reported on an annual basis, including actual figures and targets for the previous and current years, as well as the next year's forecast. Discrepancies for actual versus target figures and actions for improvement or enhancement shall be discussed. HK Electric shall update the inventory according to the figures of the electricity load forecast, upon every subsequent review by the Government. This shall also be reported in the annual report.<br><br>(The annual report of GHG emissions inventory shall be deposited with the Director of Environmental Protection within three months after the end of the reporting period.) | Complied              |
|               | <b>WATER QUALITY</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                       |
| B1            | No further mitigation measures were found to be necessary provided the discharge of cooling water and residual chlorine are kept below the rates assumed in the water quality assessment*.<br><br>*All discharges of effluent/wastewater shall be controlled through licensing under the <i>Technical Memorandum for Effluents Discharged into Drainage and Sewerage Systems. Inland and Coastal Waters</i> , issued under Section 21 of the <i>Water Pollution Control Ordinance</i> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Complied              |
|               | <b>NOISE</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                       |
| C1            | HK Electric shall implement the gas-fired units for based-load operation to minimize the noise generated from the existing units.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Complied              |
